

***Assignment 1a: Due at 11:59 pm Sunday, September 1, via email to course instructors.***

Write a 300-400 word essay describing a computer-related or science-related project on which you participated sometime between your first year of college and the present time. The writing must be original, - not a copy of a previous manuscript, lab report, or other document written in the past. Adhere as best as possible to guidelines in King's "Why not say it clearly" and in Strunk & White reading assignments.
