2022 Shanks Workshop on "100 Years of Mock Theta Functions"

Vanderbilt University, May 22-23, 2022

Sponsored by
the Shanks Endowment
The National Security Agency
the National Science Foundation
and Vanderbilt University

Speakers:

- Nick Andersen, BYU
- Krishna Alladi, University of Florida
- George Andrews, Penn State University
- Olivia Beckwith, University of Illinois at Urbana-Champaign
- Amanda Folsom, Amherst College
- Frank Garvan, University of Florida
- Michael Griffin, BYU
- Marie Jameson, University of Tennessee
- Amita Malik, Rutgers University
- Antun Milas, SUNY-Albany
- Ae Ja Yee, Penn State University

Organizers:
Larry Rolen, Ian Wagner

Aim: This workshop will bring in experts focused on the intersection of combinatorics and modularity. In particular, it will explore and aim to expand on exciting new results in the theory of integer partitions and related subjects. This conference is near the 100 year anniversary of Ramanujan's original definition of a mock theta function as recorded in his final letter to Hardy.

Financial support: Limited financial support is available with first preference on a rolling basis going to young researchers: https://my.vanderbilt.edu/mock/registration/
